Using Sergei Nikolaevich Vinogradskii's career and  
scientific research trajectory as a point of entry, this book  
illustrates the manner in which microbiologists, chemists,  
botanists, and plant physiologists inscribed the concept of  
a cycle of life into their investigations. Their research  
transformed a longstanding notion into the fundamental  
approaches and concepts that underlay the

The book presents a reconstruction of significant episodes  
of Vinogradskii's laboratory practices and the role of  
theory in their development. It paints the broader picture of  
the history of ecology, microbiology and soil science and  
how these are uniquely united: through the concept of the

cycle of life.
